Testimonials

Green Energy provided me great service! Sam, the owner, was the project manager and the site engineer. The service was completely turnkey. They took care of the permitting and the inspection with the city. Within 3 days the installation was complete and in less than 2 weeks the system was up and running and connected to the grid. I am able to view my system energy output through a phone App anytime I want and I have an account with SDG&E to view my usage compared to the energy I make. Sam was very helpful and informative throughout the whole process. I am very satisfied with their work. My SDG&E energy bill for the last 5 months has reduced to a total of \$40!!! I highly recommend Green Energy EPC to anyone.

– Hanh Dang, Poway

Green Energy EPC recently completed solar installation for our home. We are extremely pleased with the company and would highly recommend them to other customers who are looking for a business that is professional, provides quality service and products, is reasonably priced, and values customer satisfaction. Sam, who is the owner of the business, personally met with us to explain the type of solar system that would best meet our needs. Sam thoroughly described the design and installation of the system for our home and concerns in relation to the efficiency based on the design, the various types of solar equipment, the cost and savings, and the permits and timelines involved with the solar installation. It is a delight when people show up when anticipated, clean up after themselves and explain what and why they are doing certain things when asked. The next phase for us is the exciting part to see the bills drop and to know that we are being environmentally proactive.

–Ron and Thelma Vanesian, Del Mar Heights

Sam's customer service, trustworthiness and care about home owner's interest was the reason to go with the company. He installed a very well designed off-grid solar system for our two new homes. Because of his thorough understanding of our needs and analysis, now we are enjoying the free electricity. It was awesome experience, will never forget your hard work and creativity. Thank you very much. May God bless you.
